

RPS GROUP OF INSTITUTIONS

Report on

“World Cancer Day Celebration”

at

RPSCET, MAHENDERGARH

On dated

04/02/2024

Introduction: World Cancer Day is an international observance held on February 4th each year. It serves as a platform to raise awareness about cancer, promote prevention, early detection, treatment, and support for those affected by the disease. This report highlights the significance of World Cancer Day and its impact on global health initiatives.

Background: Cancer is one of the leading causes of death worldwide, accounting for millions of deaths annually. It encompasses a diverse group of diseases characterized by the uncontrolled growth and spread of abnormal cells. Factors such as tobacco use, unhealthy diet, physical inactivity, harmful alcohol use, and environmental pollutants contribute to the risk of developing cancer. Early detection, timely treatment, and supportive care are crucial for improving cancer outcomes and reducing mortality rates.

Objectives of World Cancer Day:

1. **Raise Awareness:** World Cancer Day aims to increase public awareness about cancer prevention, early detection, screening, and treatment options. It seeks to dispel myths and misconceptions surrounding the disease and promote accurate information.
2. **Promote Prevention:** The day encourages individuals and communities to adopt healthy lifestyle choices that reduce cancer risk factors, such as tobacco cessation, balanced nutrition, regular physical activity, and sun protection.
3. **Advocate for Access to Treatment:** World Cancer Day advocates for equitable access to cancer treatment, including essential medicines, diagnostic tools, and supportive care services. It highlights the importance of universal health coverage and healthcare systems that prioritize cancer prevention and control.
4. **Support Patients and Caregivers:** The day provides a platform to acknowledge the challenges faced by cancer patients, survivors, and their caregivers. It promotes

initiatives that enhance psychosocial support, improve quality of life, and address the needs of vulnerable populations affected by cancer.

Activities and Initiatives:

- Campaigns and Events: RPS students organize various campaigns, seminars, conferences, and expert lectures to mark World Cancer Day. These activities aim to engage diverse stakeholders, mobilize resources, and galvanize collective action against cancer.
- Poster making competition was also organized within the campus to increase the awareness about the cancer in the college premises.

CANCER PREVENTION

Keep your weight within healthy range, Walk more and sit less.

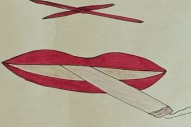

Eat a diet rich in whole grains, vegetables, fruits, and beans.

Limit "fast foods" and other processed food.

Limit sugar-sweetened drinks.

Limit alcohol, beer, wine.

Fight for your life Because you are Better than Cancer

 No Smoking	 WORLD CANCER DAY	 Avoid too much Sun
 No Alcohol		 Be Physically Active
 Poor Diet		 Healthy Diet

WORLD CANCER DAY... 4th Feb.....

Conclusion:

The world cancer Day Awareness Day Rally by RPS College served as a catalyst for raising awareness, fostering collaboration, and mobilizing support to combat the global burden of cancer. By empowering individuals, communities, and governments to take proactive measures, we can make significant strides in reducing cancer incidence, improving survival rates, and enhancing the quality of life for all those affected by the disease.

Thanks

Er. Vishal Kumar Mittal
