

2020-21(Odd Semester)

Class and Section: B.Sc. Medical 5th Sem. Subject: Plant Physiology (Botany Paper-01)

Lecture	Topics
1	Introduction to Plant Physiology
2	Structure of Water
3	Importance of water to plants
4	Properties of Water
5	Diffusion- Concept and Importance to plants
6	Imbibition- Concept and Importance to plants
7	Osmosis- Concept and Importance to plants
8	Absorption of water in Plants
9	Transport of Water in Plants
10	Transpirational Pull Theory
11	Transpiration- Concept and Significance
12	Physiology of Stomata- Active K+ Pump Theory
13	Criteria of essentiality of nutrients in Plants
14	Role of Micro Nutrients
15	Role Of Macro Nutrients- N, P, K, S etc
16	Defiency Symptoms of Nutrients
17	Munch Mass flow model
18	Source- Sink Concept for food translocation
19	Factors affecting Food translocation
20	History and Significance of Photosynthesis
21	Photosynthetic Pigments- Chlorophyll
22	Photosynthetic Pigments- Carotenoids and Phycobillins
23	Action spectra and Absorption Spectra
24	Concept of 2 Photosystems- PS I and PS II
25	Non-Cyclic Photophoshorylation or Z-Scheme
26	Cyclic Photophoshorylation
27	Calvin Cycle or C3 Cycle(Cyclic form)
28	Calvin Cycle or C3 Cycle(Structural form)
29	C4 Cycle or Hatch-Slack Pathway
30	CAM Pathway
31	Photorespiration
32	Concept of growth and development
33	Phases of Growth
34	Seed Dormancy
35	Factors to overcome seed dormancy

36	Plant Movements
37	Photoperiodism and type of plants on the basis of photoperiodism
38	Photoinduction
39	Florigen concept
40	Physiology of Flowering
41	Senescence- factors, cause and significances
42	Fruit Ripening
43	Introduction to Plant Growth Regulators
44	Auxin- Discovery and Bioassay
45	Auxin- Biosynthesis and chemical strucuture
46	Auxin- Mechanism of action(Polar Transport)
47	Auxin- Role in Plants
48	Auxin- Signalling Pathway
49	Gibberellin- Discovery and Bioassay, Biosynthesis and chemical strucuture
50	Gibberellin- Discovery and Bioassay, Biosynthesis and chemical strucuture
51	Gibberellin- Role in Plants
52	Gibberellin- Signalling Pathway
53	Cytokinin- Discovery, Bioassay, Chemical Structure
54	Cytokinin- Signaling and Role in Plants
55	ABA- Discovery, Chemical Nature and Signaling
56	ABA- Role in Plants
57	Ethylene- Discovery, Chemical nature and function in plants
58	Photomorphogenesis
59	Phytochrome- Structure, Type and Discovery
60	Phytochrome- Mechanism of action and role in Plants

RPS Degree College, Balana (Mahendergarh) son Plan 2020-21(Odd Semester) Class and Section: B.Sc Med. 5th Sem **Subject: Plant Ecology Botany-2 Topics** Lecture Introduction To Plant Ecology 1 Components of Ecology 2 3 Abiotic Components - Light 4 Water 5 Wind 6 Atmospheric Humidity 7 Temperature 8 Low and High Temp. effect 9 **Edaphic Factors** 10 Siol Texture soil water 11 Soil organism 12 Topographic factors 13 14 Biotic interaction 15 positive interaction 16 Negative interaction 17 Competition 18 **Browzing and Grazing Animals** 19 Ecological adaptation 20 Xerophytes 21 Xerophytes 22 Hydrophytes 23 Hydrophytes 24 Halophytes 25 halophytes 26 Population Introduction 27 Characterstics 28 Age pyramids 29 Population dynamics 30 Population Regulation 31 **Ecotypes And Ecades** 32 r and k Selection Community introduction 33 34 Characterstics of Community Qualitative 35 Qualitative

36	Qualitative	
37	Quantitative	
38	Quantitative characteristics	
39	Methods of Analysis	
40	Quardats Methods	
41	Ecological Succession	
42	Hydrosere	
43	Pasamosere	
44	Xerosere	
45	Ecosystem Structure And Function	
46	Food web and Pyramids ,Energy flow	
47	Biogeochemical cycles	
48	Phosphorus and water Cycle	
49	Phytogeographical Regions of India	
50	egetatinal Types of India	
51	Enviromental Pollution - Air	
52	Water pollution	
53	Global Warming	
54	Green house effect	
55	Green house gases	
56	Impact of global warming	
57	Carbon trading	
58	Zone layer depletion	_
59	Biomagnification	
60	Revision of important topic	

2020-21(Odd Semester)

Class and Section: B.Sc Medical 5th Sem

Subject: Inorganic chemistry

Introduction of syllabus Introduction of syllabus SECTION A: VBT and its limitations Postulates of CFT Crystal field splitting in octahedral field Crystal field splitting in tetrahedral field Crystal field splitting in tetrahedral field Crystal field splitting in tetrahedral field Crystal field splitting in square Planar complexes Crystal field splitting in tetragonal complexes Crystal field splitting in tetragonal complexes Description of transition metal complexes In Factors affecting CFSE Factors affecting CFSE Section of transition metal complexes Revision SECTION B: Thermodynamic stability of complexes Factors affecting stability Factors affecting stability Factors affecting stability Substitution reactions in square planar complexes Substitution reactions in square planar complexes Rate law Types of substitution reactions Trans influence Trans effect Trans effect Trans effect Theories of trans effect Revision Revision Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility and magnetic moment Variation of magnetic susceptibility with temperature	Lecture	Topics
2 Introduction of syllabus 3 SECTION A: VBT and its limitations 4 Postulates of CFT 5 Crystal field splitting in octahedral field 6 Crystal field splitting in octahedral field 7 Crystal field splitting in tetrahedral field 8 Crystal field splitting in tetrahedral field 9 Crystal field splitting in Square Planar complexes 10 Crystal field splitting in Square Planar complexes 11 Factors affecting CFSE 12 Factors affecting CFSE 13 Differences between CFT and VBT 14 Color of transition metal complexes 15 Revision 16 SECTION B: Thermodynamic stability of complexes 17 Stability Constant 18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 20 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility		-

11 Factors affecting CFSE 12 Factors affecting CFSE 13 Differences between CFT and VBT 14 Color of transition metal complexes 15 Revision 16 SECTION B: Thermodynamic stability of complexes 17 Stability Constant 18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment		
12 Factors affecting CFSE 13 Differences between CFT and VBT 14 Color of transition metal complexes 15 Revision 16 SECTION B: Thermodynamic stability of complexes 17 Stability Constant 18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility and magnetic moment		
13 Differences between CFT and VBT 14 Color of transition metal complexes 15 Revision 16 SECTION B: Thermodynamic stability of complexes 17 Stability Constant 18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment		ž
14 Color of transition metal complexes 15 Revision 16 SECTION B: Thermodynamic stability of complexes 17 Stability Constant 18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	12	Factors affecting CFSE
15 Revision 16 SECTION B: Thermodynamic stability of complexes 17 Stability Constant 18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	13	
16 SECTION B: Thermodynamic stability of complexes 17 Stability Constant 18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility and magnetic moment	14	
17 Stability Constant 18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility and magnetic moment	15	Revision
18 Kinetic and thermodynamic stability 19 Factors affecting stability 20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	16	SECTION B: Thermodynamic stability of complexes
Factors affecting stability Factors affecting stability Substitution reactions in square planar complexes Substitution reactions in square planar complexes Rate law Types of substitution reactions Trans influence Trans effect Trans effect Trans effect Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility and magnetic moment	17	Stability Constant
20 Factors affecting stability 21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	18	Kinetic and thermodynamic stability
21 Substitution reactions in square planar complexes 22 Substitution reactions in square planar complexes 23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	19	Factors affecting stability
Substitution reactions in square planar complexes Rate law Types of substitution reactions Trans influence Trans effect Trans effect Theories of trans effect Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility and magnetic moment	20	Factors affecting stability
23 Rate law 24 Types of substitution reactions 25 Trans influence 26 Trans effect 27 Trans effect 28 Theories of trans effect 29 Theories of trans effect 30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	21	Substitution reactions in square planar complexes
Types of substitution reactions Trans influence Trans effect Trans effect Theories of trans effect Theories of trans effect Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility Relation between magnetic susceptibility and magnetic moment	22	Substitution reactions in square planar complexes
Trans influence Trans effect Trans effect Theories of trans effect Theories of trans effect Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility Relation between magnetic susceptibility and magnetic moment	23	Rate law
Trans effect Trans effect Theories of trans effect Theories of trans effect Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility Relation between magnetic susceptibility and magnetic moment	24	Types of substitution reactions
Trans effect Theories of trans effect Theories of trans effect Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility Relation between magnetic susceptibility and magnetic moment	25	Trans influence
Theories of trans effect Theories of trans effect Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility Relation between magnetic susceptibility and magnetic moment	26	Trans effect
Theories of trans effect Revision SECTION C: Types of magnetic behaviour LS coupling ,Measurement of magnetic susceptibility Measurement of magnetic susceptibility Relation between magnetic susceptibility and magnetic moment	27	Trans effect
30 Revision 31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	28	Theories of trans effect
31 SECTION C: Types of magnetic behaviour 32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	29	Theories of trans effect
32 LS coupling ,Measurement of magnetic susceptibility 33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	30	Revision
33 Measurement of magnetic susceptibility 34 Relation between magnetic susceptibility and magnetic moment	31	SECTION C: Types of magnetic behaviour
Relation between magnetic susceptibility and magnetic moment	32	LS coupling ,Measurement of magnetic susceptibility
	33	Measurement of magnetic susceptibility
Variation of magnetic susceptibility with temperature	34	Relation between magnetic susceptibility and magnetic moment
	35	Variation of magnetic susceptibility with temperature

36	Orbital contribution to magnetic moment
37	Orbital contribution to magnetic moment
38	Orbital contribution to magnetic moment
39	Neels Temperature, Curies Temperature
40	Temperature independent paramagnetism
41	Temperature independent paramagnetism
42	Magnetic behavior of 3d metal complexes
43	Magnetic behavior of 3d metal complexes
44	Anomalous magnetic moment
45	Revision
46	SECTION D: Basis of electron absorption spectroscopy
47	Term symbols and coupling schemes
48	Term symbols and coupling schemes
49	Selection rules
50	Selection Rules
51	Splitting of states in Octahedral and Tetrahedral fields
52	Splitting of states in Octahedral and Tetrahedral fields
53	Spectrochemical series
54	Orgel energy level diagrams
55	Orgel energy level diagrams
56	Electronic Spectra of complex ions
57	Electronic Spectra of complex ions
58	discussion of the electronic spectrum of [Ti(H2O)6]3+ complex ion.
59	discussion of the electronic spectrum of [Ti(H2O)6]3+ complex ion.
60	Revision

RPS Degree College, Balana (Mahendergarh)

n Plan 2020-21(Odd Semester) Class and Section: B.sc 5th Sem Medical Subject: Organic Chemistry		
Lecture	Topics	
1	Principle of nuclear magnetic resonance	
2	The PMR Spectrum	
3	Number of signals	
4	Peak areas	
5	Equivalent and nonequivalent protons positions of signals and chemical shift	
6	Shielding and deshielding of protons	
7	Proton counting	
8	Splitting of signals and coupling constants	
9	Magnetic equivalence of protons	
10	Discussion of PMR spectra of the molecules: Ethyl bromide	
11	Npropyl bromide, Isopropyl bromide, 1,	
12	1-dibromoethane, 1, 1,2-tribromoethane, ethanol	
13	Acetaldehyde, ethyl acetate, toluene, Benzaldehyde and Acetophenone	
14	Simple problems on PMR spectroscopy for structure determination of organic compounds	
15	Classification and nomenclature. Monosaccharides	
16	Mechanism of osazone formation	
17	inte rconversion of glucose and fructose	
18	Chain lengthening and chain shortening of aldoses	
19	Configuration of monosaccharides	
20	Erythro and threo diastereomers	
21	Conversion of glucose into mannose	
22	Formation of glycos ides, ethers and esters	
23	Determination of ring size of glucose and fructose	
24	Open chain and cyclic structure of D(+)-Glucose & D(-) Fructose	
25	Mechanism ofmutarotation	
26	Structures of ribose and deoxyribose	
27	An Introduction to disaccharides(maltose, sucrose, lactose)	
28	Polysaccharides(starch and cellulose) without involving structure determination	
29	Organomagnesium compounds: the Grignard reagents-formation	
30	Structure and chemical reactions	
31	Organozinc compounds: Formation and chemical reactions	
32	Organolithium compounds: Formation and chemical reactions

algebra of operator 11 examples of operator 12 born interpretation and wave function 13 postulates of quantum mechanics 14 difference between classical and quantum mechanics 15 particle in 1 dim box 16 physical properties of solids 17 optical activity and it's examples 18 clausius mosotti equation 19 magnetic properties 20 gouys method 21 dielectric properties of solids 22 introduction to spectra 23 width and intensity 24 types of spectra and radiation's used 25 born openheimer approximation 26 introduction to rotational spectra 27 rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	8	eigen values and eigen function	
trigid rotor introduction to rotational spectra introduction to rotational spectra rigid rotor application of rotational spectra numerical problems introduction to vibrational spectra anharmonic oscillator anharmonic oscillator at difference between classical and quantum mechanics difference between classical and quantum mechanics postulates of quantum mechanics particle in 1 dim box physical properties of solids clausius mosotti equation pagnetic properties gouys method dielectric properties of solids introduction to spectra width and intensity types of spectra and radiation's used born openheimer approximation introduction to rotational spectra rigid rotor application of rotational spectra numerical problems introduction to vibrational spectra anharmonic oscillator anharmonic oscillator types of vibrations	9	operators	
born interpretation and wave function 13 postulates of quantum mechanics 14 difference between classical and quantum mechanics 15 particle in 1 dim box 16 physical properties of solids 17 optical activity and it's examples 18 clausius mosotti equation 19 magnetic properties 20 gouys method 21 dielectric properties of solids 22 introduction to spectra 23 width and intensity 24 types of spectra and radiation's used 25 born openheimer approximation 26 introduction to rotational spectra 27 rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	10	algebra of operator	
13 postulates of quantum mechanics 14 difference between classical and quantum mechanics 15 particle in 1 dim box 16 physical properties of solids 17 optical activity and it's examples 18 clausius mosotti equation 19 magnetic properties 20 gouys method 21 dielectric properties of solids 22 introduction to spectra 23 width and intensity 24 types of spectra and radiation's used 25 born openheimer approximation 26 introduction to rotational spectra 27 rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band , overtone, fundamental bands 35 types of vibrations	11	-	
difference between classical and quantum mechanics particle in 1 dim box physical properties of solids optical activity and it's examples clausius mosotti equation magnetic properties gouys method dielectric properties of solids introduction to spectra width and intensity types of spectra and radiation's used born openheimer approximation introduction to rotational spectra rigid rotor non rigid rotor application of rotational spectra numerical problems introduction to vibrational spectra harmonic oscillator anharmonic oscillator hot band, overtone, fundamental bands types of vibrations	12	born interpretation and wave function	
15 particle in 1 dim box 16 physical properties of solids 17 optical activity and it's examples 18 clausius mosotti equation 19 magnetic properties 20 gouys method 21 dielectric properties of solids 22 introduction to spectra 23 width and intensity 24 types of spectra and radiation's used 25 born openheimer approximation 26 introduction to rotational spectra 27 rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	13	postulates of quantum mechanics	
physical properties of solids optical activity and it's examples clausius mosotti equation magnetic properties gouys method dielectric properties of solids introduction to spectra width and intensity types of spectra and radiation's used born openheimer approximation introduction to rotational spectra rigid rotor non rigid rotor application of rotational spectra numerical problems introduction to vibrational spectra analymonic oscillator hot band, overtone, fundamental bands types of vibrations	14	difference between classical and quantum mechanics	
17 optical activity and it's examples 18 clausius mosotti equation 19 magnetic properties 20 gouys method 21 dielectric properties of solids 22 introduction to spectra 23 width and intensity 24 types of spectra and radiation's used 25 born openheimer approximation 26 introduction to rotational spectra 27 rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band , overtone, fundamental bands 35 types of vibrations	15	particle in 1 dim box	
clausius mosotti equation magnetic properties gouys method dielectric properties of solids introduction to spectra width and intensity types of spectra and radiation's used born openheimer approximation introduction to rotational spectra rigid rotor non rigid rotor application of rotational spectra mumerical problems introduction to vibrational spectra anharmonic oscillator anharmonic oscillator types of vibrations types of vibrations	16	physical properties of solids	
magnetic properties gouys method dielectric properties of solids introduction to spectra width and intensity types of spectra and radiation's used born openheimer approximation introduction to rotational spectra rigid rotor non rigid rotor application of rotational spectra numerical problems introduction to vibrational spectra and introduction to vibrational spectra and numerical problems and introduction to vibrational spectra harmonic oscillator and hot band, overtone, fundamental bands types of vibrations	17	optical activity and it's examples	
20 gouys method 21 dielectric properties of solids 22 introduction to spectra 23 width and intensity 24 types of spectra and radiation's used 25 born openheimer approximation 26 introduction to rotational spectra 27 rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	18	clausius mosotti equation	
dielectric properties of solids introduction to spectra width and intensity types of spectra and radiation's used born openheimer approximation introduction to rotational spectra rigid rotor non rigid rotor application of rotational spectra numerical problems introduction to vibrational spectra and introduction to vibrational spectra and numerical problems and introduction to vibrational spectra harmonic oscillator anharmonic oscillator anharmonic oscillator types of vibrations	19	magnetic properties	
22 introduction to spectra 23 width and intensity 24 types of spectra and radiation's used 25 born openheimer approximation 26 introduction to rotational spectra 27 rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	20	gouys method	
width and intensity types of spectra and radiation's used born openheimer approximation introduction to rotational spectra rigid rotor non rigid rotor application of rotational spectra numerical problems introduction to vibrational spectra harmonic oscillator anharmonic oscillator types of vibrations	21	dielectric properties of solids	
types of spectra and radiation's used born openheimer approximation introduction to rotational spectra rigid rotor non rigid rotor application of rotational spectra application of rotational spectra numerical problems introduction to vibrational spectra harmonic oscillator anharmonic oscillator types of vibrations	22	introduction to spectra	
born openheimer approximation introduction to rotational spectra rigid rotor non rigid rotor application of rotational spectra numerical problems introduction to vibrational spectra harmonic oscillator anharmonic oscillator hot band, overtone, fundamental bands types of vibrations	23	width and intensity	
26 introduction to rotational spectra 27 rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	24	types of spectra and radiation's used	
rigid rotor 28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	25	born openheimer approximation	
28 non rigid rotor 29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	26	introduction to rotational spectra	
29 application of rotational spectra 30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	27	rigid rotor	
30 numerical problems 31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	28	non rigid rotor	
31 introduction to vibrational spectra 32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	29	application of rotational spectra	
32 harmonic oscillator 33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	30	numerical problems	
33 anharmonic oscillator 34 hot band, overtone, fundamental bands 35 types of vibrations	31	introduction to vibrational spectra	
hot band, overtone, fundamental bands types of vibrations	32	harmonic oscillator	
35 types of vibrations	33	anharmonic oscillator	
**	34	hot band, overtone, fundamental bands	
introduction to raman spectra	35	types of vibrations	
	36	introduction to raman spectra	

37	rotational Raman spectra	
38	vibrational Raman spectra	
39	numerical	
40	previous years question paper solution	
41	revision and problems	

RPS Degree College, Balana (Mahendergarh)

Lesson Plan

2020-21(Odd Semester)

Class and Section: B.Sc Medical, 5th Sem Zoology Subject: Aquaculture Fish and Fisheries (Zoology)

Lecture	Topics
1	Introduction to Syllabus, Scheme of Exam &
	Learning Objectives/Outcomes
2	Test to Check the Learning Level of the Students
3	Introduction the World of Fisheries
4	Marine Fisheries of the World
5	Inland Fisheries of the World
6	Capture and culture fisheries
7	Status of Fish production
8	Inland capture fisheries of india
9	Fish culture of India
10	Marine Fisheries of the India
11	EEZ concept of India
12	River systen of India
13	Continue
14	Continue
15	Fishes of River system
16	Factors affecting fish yield
17	Lake system
18	Pond system
19	Reserviors fisheries
20	Cold water fisheries
21	Capture and culture fisheries
22	Fishing Crafts
23	Continue
24	Continue
25	Fishing Gears
26	Continue
27	Permutation
28	Continue
29	Culture of Fin fishes
30	Culture of Prawn
31	Culture of Pearl
32	Natural Fish Seed resourses
33	Continue
34	Spawn Investigation Technique
35	Hatchery Seed Production

36	Artificial Fertilisation
37	Factors affecting Induced Breeding
38	Fish seed
39	Continue
40	Technique of Fish culture
41	Continue
42	Cage and Polyculture
43	Management of Fishery
44	Economics of fish farming
45	Marketing of fish fishes
46	Aquaculture Technology
47	Cyropresevation
48	Continue
49	Transgenic Fishes
50	Continue
51	Revision

RPS Degree College, Balana (Mahendergarh) son Plan 2020-21(Odd Semester) Class and Section: B.Sc Medical 5th Sem **Subject: Ecology and Evolution (Zoology) Topics** Lecture Introduction to Syllabus, Scheme of Exam & 1 Learning Objectives/Outcomes Test to Check the Learning Level of the Students 2 3 Introduction to Syllabus, Scheme of Exam & Learning Objectives/Outcomes 4 Introduction to Ecology 5 Forms of Ecology 6 **Ecological Organanization** 7 Habitat And Microhabitat 8 Ecological Niche 9 Significance of Ecology 10 Environment Environmental factor Light 11 Environmental factor Temperature 12 Environmental factor Atmospheric Humidity 13 14 Environmental factor Wind 15 Environmental factor Rainfall 16 Edhaphic factors 17 Topographic factors 18 **Biotic Factors** 19 Ecosystem -Basic concept, Kind of Ecosystem 20 Structure (Components) of Ecosystem 21 Examples of Ecosystems 22 Complete and Incomplete Ecosystem 23 Trophic Level 24 Food Chain & its Types 25 Food Web or Food Cycle 26 Energy flow in Ecosystem 27 **Ecological Pyramid** 28 Productivity 29 Biogeochemical cycles Definition and its Types 30 Carbon Cycle, Nitrogen Cycle 31 Oxygen and Water Cycle 32 Phosphorus And Sulphur Cycle Population and its Characters 33 34 Population Growth Curves 35 Overpopulation and methods to control overpopulation

36	Evolution introduction	
37	Theories of Origin of Life	
38	Oparin and Haldane theory (Chemogeny)	
39	Biogeny	
40	Urey and Miller Experiment	
41	Origin of Prokaryotic Life	
42	Origin of Eukaryotes	
43	Morphological and Anatomical Evidences	
44	44 Embryological Evidence	
45	Paleontological Evidence	
46	Biochemical and physiological evidence	
47	Biogeographical and Cytological evidence	
48	Lamarkism	
49	Darwinism	
50	Mutation Theory	
51	Neo-Darwinism	
52	Modes of Natural Selection	
53 Speciation		
54	Micro-evolution	
55	Macro-evolution	
56	Mega-evolution	
57	Phylogeny of Horse	
58	Characters of Modern Horse	_
59	Human Evolution	_
60	Characters of Modern Man
