RPS Degree College, Balana (Mahendergarh)

Lesson Plan

2020-21(Odd Semester)

Class: M.Sc. Mathematics

Subject: Mathematical Analysis

Name of the Faculty: Vikash kumar

| Lecture | Topics |
|----------|--|
| | Introduction to Syllabus, Scheme of Exam & Learning |
| 1 | Objectives/Outcomes |
| 2 | Test to Check the Learning Level of the Students |
| 3 | Basic of sets and Functions |
| 4 | Lower sum and upper sums |
| 5 | Riemann integral |
| 6 | Property of Riemann integral |
| 7 | Riemann-Steiljes integral |
| 8 | Algebra of Riemann integral |
| 9 | Algebra of Riemann - Steiljes integral |
| 10 11 | R-S integral of functions |
| 12 | R-S integral of composition of functions Integrations and Diffrentations |
| 13 | R-S of continuous function |
| 14 | Fundamental theorem of calculus |
| 15 | Examples based on Fundamental theorem |
| 16 | R-S of a countable discontinuous functions |
| 17 | Generalized R-S integral |
| 18 | Darboux sums |
| 19 | Integrations of vector valued functions |
| 20 | Rectifiable curves |
| 21 | Sequence of treal numbers |
| 22 | Convergence of sequence |
| 23 | Sequence of functions |
| 24 | Series of functions |
| 25 | Pointwise convergence of sequence |
| 26 | Uniform convergence |
| 27 | Weierstrass M test |
| 28 | M_n Test for for uniform convergence |
| 29 | Abel's test |
| 30 | Dirichlet's test |
| 31 32 | Uniform convergence and continuity |
| | Uniform convergence and integration |
| 33 | Uniform convergence and Differentiation Weierstrass approximation test |
| 34 35 | Uniform convergence of series of functions |
| 36 | Power series |
| 37 | Uniform convergence and uniqueness theorem |
| 38 | Abel's Theorem |
| 39 | Tauber's Theorem |
| 40 | Functions of severals variables |
| 41 | Linear transformations |
| 42 | Euclidean Space |
| 43 | Derivative of an open subset R^n |

| 44 | Chain rule |
|----|---|
| 45 | Partial Derivative |
| 46 | Continuously Differentiable mapping |
| 47 | Young's Theorem |
| 48 | Schwarz Theorem |
| 49 | Examples based on Continuously Differentiable mapping |
| 50 | Example based on Tubers theorem |
| 51 | Taylors theorem |
| 52 | Heigher order Derivative |
| 53 | Explicit and implicit function |
| 54 | Implicit function theorem |
| 55 | Inverse function theorem |
| 56 | Change of variables |
| 57 | Extreme value of Explicit function |
| 58 | Lagrange Multipliers function |
| 59 | Jacobian |
| 60 | Properties of Jacobian |

RPS Degree College, Balana (Mahendergarh) Lesson Plan

Class and Section: M.Sc.(Math) 1st Sem.

Subject: Ordinary Differential Equation(Code: MAT-103)

Name of the Faculty: Dr. Parveen Kumar Gaur

| Traine of | the Faculty: Dr. Farveen Kumar Gaur |
|-----------|--|
| | |
| | Introduction to Syllabus, Scheme of Exam & Learning |
| 1 | Objectives/Outcomes |
| 2 | Advancement |
| 3 | Test to Check the Learning Level of the Students |
| 4 | Preliminaries |
| 5 | Approximate solution |
| | Cauchy-Euler construction of an approximate solution of an initial value |
| 6 | problem |
| | Cauchy-Euler construction of an approximate solution of an initial value |
| 7 | problem |
| 8 | Equicontinuous family of functions |
| 9 | Equicontinuous family of functions Equicontinuous family of functions |
| 10 | Ascoli-Arzela Lemma |
| 11 | Ascoli-Arzela Lemma |
| 12 | Cauchy-Peano existence theorem |
| 13 | Cauchy-Peano existence theorem |
| 14 | Lipschitz condition |
| 15 | Picard-Lindelof existence and uniqueness theorem |
| | Picard-Lindelof existence and uniqueness theorem |
| 16 17 | Solution of initial-value problems by Picard's method |
| | Solution of initial-value problems by Picard's method |
| 18 19 | Dependence of solutions on initial conditions. |
| | Linear systems |
| 20 | Matrix method for homogeneous first order system of linear differential |
| 21 | equations |
| | Matrix method for homogeneous first order system of linear differential |
| 22 | equations |
| 23 | Basic theory of the homogeneous linear system |
| 24 | Basic theory of the homogeneous linear system Basic theory of the homogeneous linear system |
| | Fundamental set of solutions |
| 25 26 | Fundamental set of solutions Fundamental matrix of solutions |
| 26 | |
| | Wronskian of solutions |
| 28 29 | Abel-Liouville formula Abel-Liouville formula |
| | |
| 30 | Non-homogeneous linear system Non-homogeneous linear system |
| 31 | Strum Theory |
| 32 | Strum Theory Strum Theory |
| 33 | Self-adjoint equations of the second order |
| 34 | Self-adjoint equations of the second order Self-adjoint equations of the second order |
| 35 | Some basic results of Sturm theory |
| 36 | Abel's formula |
| 37 | |
| 38 | Abel's formula |
| 39 | Strum Separation theorem |

| 40 | |
|----|--|
| 40 | Strum Separation theorem |
| 41 | Strum's Fundamental comparison theorem |
| 42 | Strum's Fundamental comparison theorem |
| 43 | Nonlinear differential systems |
| 44 | Nonlinear differential systems |
| 45 | Phase plane |
| 46 | Path |
| 47 | Critical points |
| 48 | Autonomous systems |
| 49 | Autonomous systems |
| 50 | Isolated critical point |
| 51 | Path approaching a critical point |
| 52 | Path entering a critical point |
| 53 | Types of critical points - Center, Saddle points, Spiral points, Node points |
| 54 | Types of critical points - Center, Saddle points, Spiral points, Node points |
| 55 | Stability of critical points |
| 56 | Stability of critical points |
| 57 | Asymptotically stable critical points |
| 58 | Asymptotically stable critical points |
| 59 | Unstable critical points |
| 60 | Unstable critical points |
| 61 | Critical points and paths of linear systems. |
| 62 | Critical points and paths of linear systems. |
| 63 | Almost linear systems |
| 64 | Critical points and paths of almost linear systems |
| 65 | Critical points and paths of almost linear systems |
| 66 | Nonlinear conservative dynamical systems |
| 67 | Nonlinear conservative dynamical systems |
| 68 | Dependence on a parameter |
| 69 | Liapunov's direct method |
| 70 | Liapunov's direct method |
| 71 | Limit Cycles and Periodic solutions |
| 72 | Limit Cycles and Periodic solutions |
| 73 | Existence and nonexistence of limit cycles |
| 74 | Existence and nonexistence of limit cycles |
| 75 | Bendixson's nonexistence criterion |
| 76 | Poincare-Bendixson theorem |
| 77 | Index of a critical point |
| 78 | Strum-Liouville problems |
| 79 | Strum-Liouville problems |
| 80 | Orthogonality of characteristic functions |

Lesson Plan

Class and Section: M.Sc.(Math) 1st Sem

Subject: Complex Analysis(Code: MAT-104)

Name of the Faculty: Dr. Garima Tomar

| | Topics | |
|----|--|----------|
| 1 | Introduction to Syllabus, Scheme of Exam & | Learning |
| 1 | Objectives/Outcomes | |
| 2 | Test to Check the Learning Level of the Students | |
| 3 | Functions of a complex variable | |
| 4 | Limit and Continuity | |
| 5 | Di∂erentiability | |
| 6 | Examples on Continuity and differentiability | |
| 7 | Analytic functions and their properties, | |
| 8 | Analytic functions and their properties, | |
| 9 | Cauchy-Riemann equations in Cartesian coordinates | |
| 10 | Cauchy-Riemann equations in polar coordinates | |
| 11 | Power series | |
| 12 | Radius of convergence | |
| 13 | Radius of convergence | |
| 14 | Diderentiability of sum function of a power series | |
| 15 | Successive differentiation | |
| 16 | Branches of many valued functions | |
| 17 | Arg z, Log z, Z^a | |
| 18 | Path in a region, Contour | |
| 19 | Complex integration and related questions | |
| 20 | Cauchy theorem | |
| 21 | Cauchy theorem questions | |
| 22 | Cauchy integral formula | |
| 23 | Cauchy integral formula questions | |
| 24 | Extension of Cauchy integral formula for multiple connected domain | |
| 25 | Poisson integral formula | |
| 26 | Higher order derivatives | |
| 27 | Complex integral as a function of its upper limit | |
| 28 | Morera theorem | |
| 29 | Cauchy inequality | |
| 30 | Taylor theorem | |
| 31 | Zeros of an analytic function | |
| 32 | Laurent series | |
| 33 | Laurent series | |
| 34 | Isolated singularities questions | |
| 35 | Cassorati-Weierstrass theorem | |
| 36 | Limit point of zeros and poles | |
| 37 | Maximum modulus principle | |

| _ | | |
|---|----|--|
| | 38 | Schwarz lemma |
| | 39 | Meromorphic functions |
| | 40 | Meromorphic functions |
| | 41 | Meromorphic functions |
| | 42 | Argument principle |
| | 43 | Rouche theorem |
| | 44 | Questions on above topics |
| | 45 | Fundamental theorem of algebra |
| | 46 | Inverse function theorem |
| | 47 | Calculus of residues |
| | 48 | Calculus of residues |
| | 49 | Cauchy residue theorem |
| | 50 | Evaluation of integrals of various types |
| | 51 | Evaluation of integrals of various types |
| | 52 | Evaluation of integrals of various types |
| | 53 | Evaluation of integrals of various types |
| | 54 | Conformal mappings |
| | 55 | Space of analytic functions and their completeness |
| | 56 | Hurwitz theorem |
| | 57 | Montel theorem |
| | 58 | Riemann mapping theorem |
| | 59 | Questions on above topics |
| | 60 | Questions on above topics |
| | | |

RPS Degree College, Balana (Mahendergarh) Lesson Plan Class and Section: M.Sc. Mathematics 1st Sem Subject: Mathematical Statistics Name of the Faculty: Mr. Satyender Singh

| | he Faculty : Mr. Satyender Singh |
|----------|---|
| Lecture | Topics |
| 1 | Introduction to Syllabus, Scheme of Exam & Learning |
| | Objectives/Outcomes |
| 2 | Concept of Probability |
| 3 | Defintions of Probability |
| 5 | Addition theorem |
| 6 | Multiplication theorem Boole's Inequality |
| 7 | Conditional Probability |
| 8 | Numericals |
| 9 | Independence of events |
| 10 | Numericals |
| 11 | Baye's theorem |
| 12 | Numericals |
| 13 | Applications of Bayes' theorem |
| 14 | Random Variable |
| 15 | Probability functions |
| 16 | Probability mass and density functions |
| 17 | Cumulative distribution functions |
| 18 | Numericals |
| 19 20 | Concept of Bivariate random variable |
| 21 | Joint density functions Numericals |
| 22 | Marginal Distributions |
| 23 | Conditional distribution |
| 24 | Numericals |
| 25 | Mathematical Expectation |
| 26 | Properties of Expectation |
| 27 | Variance and covariance in terms of expectation |
| 28 | Moment generating function |
| 29 | Properties of MGF |
| 30 | Discrete Distributions |
| 31 | Uniform Distribution |
| 32 | Bernoulli Distribution |
| 33 | Binomial Distribution |
| 35 | Properties of Binomial Distribution Poisson Distribution |
| 36 | Properties of Poisson Distribution |
