

2020-21(Odd Semester)
Class and Section: M.Sc Math 3rd Semester

**Subject: Functional Analysis** 

Lecture	Topics
1	Introduction to Syllabus, Scheme of Exam &
1	Learning Objectives/Outcomes
2	Test to Check the Learning Level of the Students
3	Definition of normed linear space
4	Basic properties of normed linear space
5	Basic properties of Normed linear space and example
6	Bounded linear transformation
7	examples of bounded linear transformmation
8	Completion of normed linear space
9	Banach space
10	examples of Banach space
11	holders inequality
12	minkowski inequality
13	completeness of quotient space of normed linear space
14	continuous linear functional
15	completeness of some subspaces
16	completeness of some more subspaces
17	Hahn Banach theorem
18	finite dimensional normed linear space
19	example of finite dimensional normed linear space
20	bounded linear transformation
21	examples of bounded linear transformation
22	equivalent formation of continuity
23	theorem on formation of continuity
24	conjugate spaces
25	examples of conjugate spaces
26	theorem on conjugate spaces
27	Hahn Banach theorem

20	Inno of of Holm Domoch the onem
28	proof of Hahn Banach theorem
29	some applications of Hahn Banach theorem
30	Riesz representation theorem
31	proof of riesz representation theorem
32	riesz representation theorem of some spaces
33	second conjugate spaces
34	Examples of second conjugate spaces
35	Reflexive spaces
36	examples of reflexive spaces
37	Proof on reflexive spaces
38	to prove some space a reflexive space
39	to prove some space a reflexive space
40	uniform bounded principle
41	Axiom on uniform bounded principle
42	Consequences of uniform bounded principle
43	Proof of uniform bounded principle
44	Open Mapping theorem
45	Proof of open mapping theorem
46	Application of open Mapping theorem
47	closed graph theorem
48	proof of closed graph theorem
49	Equivalent norms
50	examples of equivalent norms
51	proof of equivalent norms
52	some diffrent example of equivalent norms
53	weak convergence
54	Strong convergence
55	Difference between weak convergence and strong convergence
56	equivalence in finite dimensional spaces  Compact operator
57	Compact operator  Compact operator and it's relation with continuous operator
58 59	theorem on compact operator
60	Compactness of linear operator on finite dimensional space
61	Compactness of linear operator on finite dimensional space
62	Area bounded by closed curves
63	Properties of compact operators
64	Properties of Compact operators
65	Properties of Compact operators
66	Compactness of limit of the sequences
67	compact ness of limit of sequences
_	

68	proof of above theorem
69	Application of above theorem
70	Application of above theorem

Class and Section: M.Sc 3rd Sem. Subject: Advanced Topology

Introduction to Syllabus, Scheme of Exam & Learning Objectives/Outcomes  Test to Check the Learning Level of the Students Topics Defination of regular space & its characterisation Defination of T3 space and theorems of T3 space Hereditary and Topological property of T3 space Hereditary and Topological property of T3 space Hereditary and Topological property of T4 space Hereditary and Topological property of T4 space Hereditary and Topological property of T4 space Hausdorff space is a T3 Space and T4 Space Regularity of a compact hausdorff space Normality of a compact hausdorff space T3 half space T3 half space T3 half space T5 space T6 Characterisation of T3 half space Characterisation of T3 half space T6 Characterisation of T3 space T7 Fietze extension theorem Urysohn's Lemma T7 pological and Hereditary property of T5 Space and T3 half Short type questions of First Unit Definition of Filter and examples Types of filter Definition of Filter and examples Filter generated by a collection of sets Base and sub-base of a filter Theorem related to filter Theorem related to filter Theorem related to cluster point of a filter and examples Theorem related to cluster point and convergent filter Definition of cluster point of a filter and their examples Theorem related to cluster point and convergent filter Theorem related to cluster point and convergent filter Examples Theorem related to cluster point and convergent filter Examples Characterisation of ultra filter Characterisation of ultra filter Canonical way of converting nets to filters and vice-versa Macunical way of convergent filter and their examples Hausdorff space and convergence of filters and vice-versa Convergent net and filters and vice-versa Macunical way of convergence of filter and vice-versa Definition of net and cluster of filter and vice-versa Definition of net and cluster of filter point of net Definition of net and camples Definition of net and camples		nced Topology
Test to Check the Learning Level of the Students Topics Defination of regular space & its characterisation Defination of T3 space and theorems of T3 space Hereditary and Topological property of T3 space Hereditary and Topological property of T3 space Hereditary and Topological property of T4 space Hausdorff space is a T3 Space and T4 Space Regularity of a compact hausdorff space INOrmality of a compact hausdorff space IT Shalf space T3 half space T3 half space T4 Every compact hausdorff space is Regular and Normal Characterisation of T3 half space Characterisation of T3 half space Characterisation of T5 space T7 Tietze extension theorem Urysohn's Lemma Topological and Hereditary property of T5 Space and T3 half Short type questions of First Unit Definition of Filter and examples Types of filter Jefinition of Filter and examples Tilter generated by a collection of sets Base and sub-base of a filter Theorem related to cluster point of a filter and examples Theorem related to cluster point of a filter and their examples Theorem related to cluster point of a filter and their examples Theorem related to cluster point of a filter and their examples Theorem related to cluster point and convergent filter Examples Definition of sub filter and ultra filter and their examples Hausdorff space and convergent filter Canonical way of converting nets to filters and vice-versa May Canonical way of converting nets to filters and vice-versa May Canonical filter so filters and vice-versa May Canonical filter of the filter and cluster of filter and vice-versa Definition of net and cluster of filter and vice-versa Definition of onvergent net and cluster point of net Definition of onvergent net and cluster point of net	Lecture	Topics
Objectives/Outcomes  2 Test to Check the Learning Level of the Students  3 Topics  4 Defination of regular space & its characterisation  5 Defination of T3 space and theorems of T3 space  6 Hereditary and Topological property of T3 space  7 Defination of normal space and its characterisation  8 Hereditary and Topological property of T4 space  9 Hausdorff space is a T3 Space and T4 Space  10 Regularity of a compact hausdorff space  11 Normality of a compact hausdorff space  12 T3 half space  13 T5 space  14 Every compact hausdroff space is Regular and Normal  15 Characterisation of T3 half space  16 Characterisation of T5 space  17 Tietze extension theorem  18 Urysohn's Lemma  19 Topological and Hereditary property of T5 Space and T3 half  20 Short type questions of First Unit  21 Definition of Filter and examples  22 Types of filter  23 Union and Intersection of filters and examples  4 Filter generated by a collection of sets  24 Filter generated by a collection of sets  25 Base and sub-base of a filter  26 Theorem related to filter  27 Filter generated by base  28 Definition of Convergent filter and examples  19 Theorem related to filter  30 Definition of cluster point of a filter and examples  31 Theorem related to cluster point and convergent filter  32 Examples  33 Definition of sub filter and ultra filter and their examples  34 Hausdorff space and convergent filter  35 Every filter is contained in an ultra filter  36 Characterisation of ultra filter  37 Canonical way of converting nests to filters and vice-versa  38 Convergent net and filters and vice-versa  40 Image filter  41 Continuity in terms of convergence of filters  42 Stone Cech compactification theorem  43 Doubts of filters topic  44 Definition of net and examples  45 Definition of onvergent net and cluster point of net  46 Definition of convergent net and cluster point of net	1	Introduction to Syllabus, Scheme of Exam & Learning
3 Topics 4 Defination of regular space & its characterisation 5 Defination of T3 space and theorems of T3 space 6 Hereditary and Topological property of T3 space 7 Defination of normal space and its characterisation 8 Hereditary and Topological property of T4 space 9 Hausdorff space is a T3 Space and T4 Space 10 Regularity of a compact hausdorff space 11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T3 half space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of convergent filter and examples 31 Theorem related to cluster point of a filter and their examples 32 Hausdorff space and convergent filter 33 Definition of subfilter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subhet and examples 45 Definition of on Subnet and examples 46 Definition of on Subnet and examples 47 Definition of on Subnet and examples		Objectives/Outcomes
4 Defination of regular space & its characterisation 5 Defination of T3 space and theorems of T3 space 6 Hereditary and Topological property of T3 space 7 Defination of normal space and its characterisation 8 Hereditary and Topological property of T4 space 9 Hausdorff space is a T3 Space and T4 Space 10 Regularity of a compact hausdorff space 11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of subster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of subster point of a filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subster and examples 45 Definition of of subster and examples 46 Definition of of subster and examples		Test to Check the Learning Level of the Students
5 Defination of T3 space and theorems of T3 space 6 Hereditary and Topological property of T3 space 7 Defination of normal space and its characterisation 8 Hereditary and Topological property of T4 space 9 Hausdorff space is a T3 Space and T4 Space 10 Regularity of a compact hausdorff space 11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of sub filter and convergent filter 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and cluster of filters and vice-versa 40 Union filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	3	Topics
6 Hereditary and Topological property of T3 space 7 Defination of normal space and its characterisation 8 Hereditary and Topological property of T4 space 9 Hausdorff space is a T3 Space and T4 Space 10 Regularity of a compact hausdorff space 11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdorff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T3 half space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and cluster of filters and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets		Defination of regular space & its characterisation
7 Defination of normal space and its characterisation 8 Hereditary and Topological property of T4 space 9 Hausdorff space is a T3 Space and T4 Space 10 Regularity of a compact hausdorff space 11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 39 Cluster point of net and cluster of filters 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffiness and nets	5	Defination of T3 space and theorems of T3 space
8 Hereditary and Topological property of T4 space 9 Hausdorff space is a T3 Space and T4 Space 10 Regularity of a compact hausdorff space 11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysoln's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	6	Hereditary and Topological property of T3 space
9 Hausdorff space is a T3 Space and T4 Space 10 Regularity of a compact hausdorff space 11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysoln's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 39 Cluster point of net and cluster of filter and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples	7	Defination of normal space and its characterisation
10 Regularity of a compact hausdorff space 11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of of Convergent filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 39 Cluster point of net and cluster of filters 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	8	Hereditary and Topological property of T4 space
11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of convergent filter and examples 31 Theorem related to cluster point of a filter and examples 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 39 Cluster point of net and cluster of filters 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	9	Hausdorff space is a T3 Space and T4 Space
11 Normality of a compact hausdorff space 12 T3 half space 13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of convergent filter and examples 31 Theorem related to cluster point of a filter and examples 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 39 Cluster point of net and cluster of filters 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	10	Regularity of a compact hausdorff space
13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 39 Cluster point of net and cluster of filter and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	11	
13 T5 space 14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 39 Cluster point of net and cluster of filter and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	12	
14 Every compact hausdroff space is Regular and Normal 15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 44 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	13	
15 Characterisation of T3 half space 16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	14	
16 Characterisation of T5 space 17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of on teand examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	15	
17 Tietze extension theorem 18 Urysohn's Lemma 19 Topological and Hereditary property of T5 Space and T3 half 20 Short type questions of First Unit 21 Definition of Filter and examples 22 Types of filter 23 Union and Intersection of filters and examples 24 Filter generated by a collection of sets 25 Base and sub-base of a filter 26 Theorem related to filter 27 Filter generated by base 28 Definition of Convergent filter and examples 29 Therom based on filter 30 Definition of cluster point of a filter and examples 31 Theorem related to cluster point and convergent filter 32 Examples 33 Definition of sub filter and ultra filter and their examples 34 Hausdorff space and convergent filter 35 Every filter is contained in an ultra filter 36 Characterisation of ultra filter 37 Canonical way of converting nets to filters and vice-versa 38 Convergent net and filters and vice-versa 40 Image filter 41 Continuity in terms of convergence of filters 42 Stone Cech compactification theorem 43 Doubts of filters topic 44 Definition of subnet and examples 45 Definition of subnet and examples 46 Definition of subnet and examples 47 Hausdorffness and nets	16

#### **Lesson Plan**

R P S D C MAHENDERGARH	Lesson Plan
Class and	2020-21(Odd Semester) Section: M.Sc Math 3rd Sem
	Discrete Mathematics
Lecture	Topics
1	Introduction to Syllabus, Scheme of Exam & Learning Objectives/Outcomes
2	Test to Check the Learning Level of the Students
3	Statements: Symbolic Representation and Tautologies
4	Quantifiers, Predicates and validity
5	Prepositional Logic.
6	Semigroups and Monoids-
7	Definitions and examples of semigroups
8	Definitions and examples of monoids
9	Homomorphism of semigroups and monoids.
10	Congruence relation and Quotient semigroups
11	Subsemigroups and submonoids
12	Direct products.
13	Basic homomorphism theorem.
14	Pigeonhole principle,
15	principle of inclusion and exclusion
16	derangements.
17	Lattices
18	Lattices as partially ordered sets
19	properties of lattices
20	Lattices as Algebraic systems
21	Sub lattices
22	Direct products and Homomorphism
23	Some special
24	Complete lattices
25	Complemented lattices
26	Distributive Lattices
27	Join-irreducible elements
28	Join-irreducible elements
29	Boolean Algebras
30	Boolean Algebras as Lattices
31	Various Boolean Identities
32	The Switching Algebra example
33	Subalgebras
34	Direct Products and Homomorphism
35	Boolean forms and their equivalence

36	Minterm
37	Boolean forms
38	Sum of Products
39	Canonical forms
40	Canonical forms
41	Minimization of Boolean functions
42	Applications of Boolean Algebra to Switching Theory
43	using AND, OR and NOT gates
44	The Karnaugh method.
45	Finite state Machines
46	their transition tables
47	their transition diagrams
48	Equivalence of Finite State Machines
49	Reduced Machines
50	Homomorphism
51	Finite automata and Acceptors
52	Non-deterministic Finite Automata
53	equivalence of its power to that of deterministic Finite automata
54	Moore Machines.
55	Mealy Machines.
56	Grammars and Language
57	Phrase-Structure Grammars, Rewriting rules
58	Derivations, Sentential forms, Language generated by a Grammar
59	Regular, Context-free and Context sensitive grammars and Languages
60	Regular sets, Regular expressions and the Pumping Lemma, Kleene's theorem.

2020-21(Odd Semester)

Class and Section: M.Sc.(Math) 3rd Sem Subject: Analytical Number Theory 310

Lecture	Topics
1	Introduction to Syllabus, Scheme of Exam &
1	Learning Objectives/Outcomes
2	Test to Check the Learning Level of the Students
3	Distribution of primes
4	Distribution of primes
5	Fermat and Mersenne numbers
6	Fermat and Mersenne numbers
7	Fermat and Mersenne numbers
8	Farey series and some results concerning Farey series
9	Farey series and some results concerning Farey series
10	Approximation of irrational numbers by rationals
11	Approximation of irrational numbers by rationals
12	Hurwitz's theorem
13	Hurwitz's theorem
14	Irrationality of e and $\pi$
15	Irrationality of e and $\pi$
	Irrationality of e and $\pi$
16	·
17	The arithmetic in Zn
18	The arithmetic in Zn
19	The arithmetic in Zn
20	The group Un
21	The group Un
22	Primitive roots and their existence
23	Primitive roots and their existence
24	Primitive roots and their existence
25	Primitive roots and their existence
26	Group Upn (p-odd) and U2n
27	Group Upn (p-odd) and U2n
28	Group Upn (p-odd) and U2n
29	Group Upn (p-odd) and U2n
30	The group of quadratic residues Qn
31 32	The group of quadratic residues Qn The group of quadratic residues Qn
33	The group of quadratic residues Qn  The group of quadratic residues Qn
34	Quadratic residues for prime power & arbitrary moduli
35	Quadratic residues for prime power & arbitrary moduli
36	The algebraic structure of Un and Qn
37	The algebraic structure of Un and Qn
38	The algebraic structure of Un and Qn
39	The algebraic structure of Un and Qn
40	Riemann Zeta Function ζ(s) and its convergence
41	Riemann Zeta Function $\zeta(s)$ and its convergence
42	Riemann Zeta Function $\zeta(s)$ and its convergence
43	Application to prime numbers, $\zeta(s)$ as Euler product
44	Application to prime numbers, $\zeta(s)$ as Euler product
45	Application to prime numbers, $\zeta(s)$ as Euler product
46	Evaluation of $\zeta(2)$ and $\zeta(2k)$ .

48 Evaluation of ζ(2) and ζ(2k).  49 Evaluation of ζ(2) and ζ(2k).  50 Diophantine equations  51 Diophantine equations  52 Diophantine equations  53 Diophantine equations  54 Diophantine equations  55 The representation of number by two or four squares  56 The representation of number by two or four squares  57 The representation of number by two or four squares  58 Waring problem  59 Waring problem	
50 Diophantine equations 51 Diophantine equations 52 Diophantine equations 53 Diophantine equations 54 Diophantine equations 55 The representation of number by two or four squares 56 The representation of number by two or four squares 57 The representation of number by two or four squares 58 Waring problem	
51 Diophantine equations 52 Diophantine equations 53 Diophantine equations 54 Diophantine equations 55 The representation of number by two or four squares 56 The representation of number by two or four squares 57 The representation of number by two or four squares 58 Waring problem	
51 Diophantine equations 52 Diophantine equations 53 Diophantine equations 54 Diophantine equations 55 The representation of number by two or four squares 56 The representation of number by two or four squares 57 The representation of number by two or four squares 58 Waring problem	
52 Diophantine equations 53 Diophantine equations 54 Diophantine equations 55 The representation of number by two or four squares 56 The representation of number by two or four squares 57 The representation of number by two or four squares 58 Waring problem	
53 Diophantine equations 54 Diophantine equations 55 The representation of number by two or four squares 56 The representation of number by two or four squares 57 The representation of number by two or four squares 58 Waring problem	
54 Diophantine equations 55 The representation of number by two or four squares 56 The representation of number by two or four squares 57 The representation of number by two or four squares 58 Waring problem	
55 The representation of number by two or four squares 56 The representation of number by two or four squares 57 The representation of number by two or four squares 58 Waring problem	
The representation of number by two or four squares The representation of number by two or four squares Waring problem	
57 The representation of number by two or four squares 58 Waring problem	
58 Waring problem	
Jy waring problem	
60 Four square theorem	
61 Four square theorem	
Four square theorem	
The numbers $g(k)$ and $G(k)$ ,	
The numbers $g(k)$ and $G(k)$ ,	
65 Lower bounds for g(k) and G(k).	
66 Lower bounds for g(k) and G(k).	
Lower bounds for $g(k)$ and $G(k)$ .	
68 Lower bounds for g(k) and G(k).	
Arithmetic functions $\varphi(n)$ , $\tau(n)$ , $\sigma(n)$ ,	
70 Examples and simple properties	
71 Examples and simple properties	
72 Perfect numbers	
73 Perfect numbers	
74 Perfect numbers	
75 Mobius inversion formula	
76 Mobius inversion formula	
77 The Mobius function μ(n)	
78 The Mobius function μ(n)	
The order & average order of function $\varphi(n)$ , $\tau(n)$ and $\sigma(n)$	
The order & average order of function $\varphi(n)$ , $\tau(n)$ and $\sigma(n)$

Lecture	Topics
1	Introduction to Syllabus, Scheme of Exam &
2	Test to Check the Learning Level of the Students
3	What is computer, Characteristics of computer
4	Advantages of Computer, Limitation of Computer
5	Types of Computer
6	Application of Computer, Data Representation
7	Hardware,Firmware,Liveware
8	Software, Relationship between Hardware and Software
9	System software, Operating System
10	Translator,Interpreter,Compiler
11	Assemblers, Linkers
12	Overview of Operating system
13	Functions of operaing system
14	Information system:Meaning,Need of an efficient information system
15	Types of information system
16	Information requirement for Planning, Coordination
17	Information requirement for control for various levels in business, Industry
18	Basic of data arrangement and access
19	Introduction to database, Definition, Uses of databases
20	Characteristics of database,DBMS
21	Data independencies
22	Difference between traditional file processing system and database approaches
23	LAN,WAN
24	Wireless Network
25	Introduction to networking
26	Importance of networking
27	Communication devices such as modem
28	Features of networking
29	Introduction to Internet:Meaning of Internet
30	Growth of Internet
31	Owner of Internet
32	Anatomy of internet
33	Basic Internet Terminology
34	World Wide Web
35	Internet Protocols
36	Usage of internet to society
37	Search engines
38	Introduction to MS Word
39	Features of MS-Word
40	Component of word document

41	Creating a document
42	Printing a document
43	Formatting text and document
44	Mail Merge
45	Macro
46	Export and Import file
47	Working with auto shapes
48	Adding pictures to a work document
49	Introduction to MS Excel
50	Features of Excel
51	Creating a table
52	Formatting worksheet
53	Types of graph
54	Excel functions
55	Printing a worksheet
56	Managing and organizing data
57	Powerpoint presentation
